Play Store Pulse: MoveInSync (Employee)

Data through 2026-10-11 · 721 written reviews in the last 90 days · regenerated by `python run.py`

How to read this page

- This page is built from **real Play Store reviews** of the MoveInSync employee app. It updates every time the tool runs.
- **Written review** = a star rating that comes with text. **Bad review** = 1 or 2 stars.
- **"Last 90d"** = the last 3 months. **"vs prior period"** = compared with the 3 months before that.
- **Stars lost** = how far a review is from 5★. A 1★ review loses 4 stars, a 4★ review loses 1. Adding these up per problem shows which problems hurt the rating most.
- **pts** = percentage points. Going from 24% to 35% is +11 pts.

Rating shown on the Play Store

4.64★

114,880 ratings · 6% are 1★

Average stars in written reviews (last 3 months)

3.81★

flat vs prior period

Share of written reviews that are bad (1-2★)

28%

+1.6 pts vs prior period

Bad reviews that got a reply from MoveInSync

1.0%

was ~97% through Q1 2024

The headline hides the complaints

86% of all store ratings are 5★ (mostly tap-only, prompted ratings), but people who write a review give 3.81★ on average and 28% of them give 1-2★. The written reviews are the ones new users read.

Releases keep knocking the rating down

Recent releases with a spike in negative reviews: 12.7, 12.13, 12.14, 12.16, 12.17, 12.19. Latest (12.19) is at 35% negative.

The in-app rating prompt backfires

25 reviews in the last 18 months complain that the trip rating can't be skipped (avg

1.7★). Users then come to the Play Store to leave 1★.

Who can fix the problems?

Every complaint is labelled with the team that can fix it. The bar shows how much of the total damage (stars lost) belongs to each team.

Share of stars lost in written reviews (5 – rating, split across the issues each review mentions), last 90 days

Mobile eng 32%	Product 21%	Ops 21%	Unspecific 27%

52% can be fixed by the team that builds the app (app developers + product). Ops problems (late cabs, routes, drivers) must go to the transport and vendor teams.

Which problems hurt the rating most

Problems are ranked by the share of stars lost in the last 3 months, biggest first. **Click any row** to read real reviews about that problem.

#	Issue	Owner	Share of damage	%	Bad reviews	Change
1	Crashes / won't open / blank screen	Mobile eng		10%	24	-1 pts
2	Booking / cancel / edit / no-show rules	Product / UX		8%	24	+1 pts
3	New UI / update made it worse	Product / UX		6%	18	+2 pts
4	"Not installed from Play Store" lockout	Mobile eng		6%	13	+5 pts
5	General service complaint (unspecific)	Ops / vendors		6%	12	-0 pts
6	Cab late / not assigned / no-show by vendor	Ops / vendors		5%	16	-3 pts

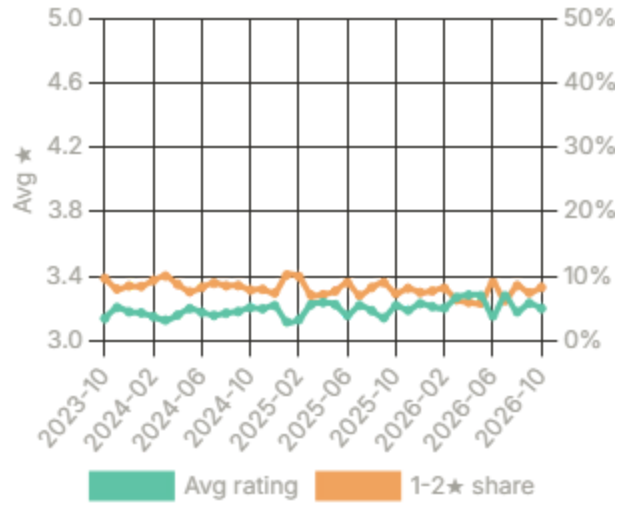

7	Login / OTP not received	Mobile eng		5%	13	-2 pts
8	Helpdesk / support unreachable	Ops / vendors		5%	15	-2 pts
9	Live tracking / ETA inaccurate	Mobile eng		5%	16	-3 pts
10	Forced ratings, pop-ups, notification spam, permissions	Product / UX		4%	13	-0 pts
11	Slow / loading / freezes	Mobile eng		4%	12	-3 pts
12	Long routes / bad pooling	Ops / vendors		4%	11	+1 pts
13	No in-app way to give feedback / complaints ignored	Product / UX		2%	6	+2 pts
14	Forced logouts / session expired	Mobile eng		1%	3	-2 pts
15	Safety concern	Ops / vendors		1%	5	+0 pts
16	Driver behaviour	Ops / vendors		1%	2	+1 pts
17	Calling / chatting with driver	Mobile eng		0%	2	-1 pts

24% of 1-2★ reviews name no specific issue ("worst app"). "Change" = how much more (red) or less (green) often this problem appears in bad reviews, compared with the 3 months before.

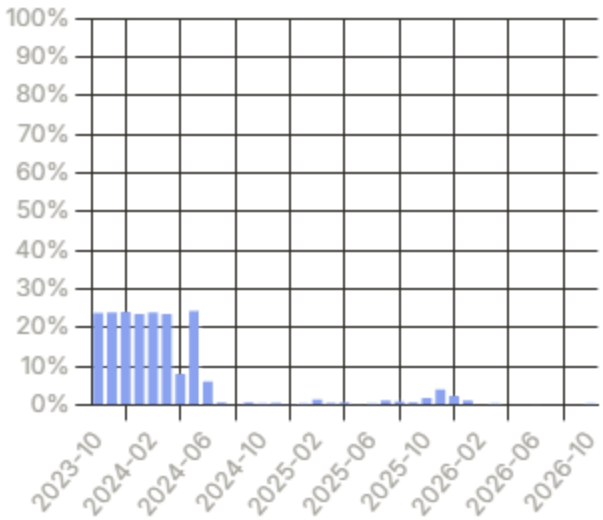

How things changed over time

Left: the green line is the average stars in written reviews each month (higher is better); the orange line is the share of bad reviews (lower is better). Right: the share of reviews MoveInSync replied to each month. Replies almost stopped in mid-2024.

Average stars (green) and share of bad reviews (orange), by month

Share of reviews MoveInSync replied to, by month

How each app update performed

Each row is an app update, newest first. A share of bad reviews in red means the update made things worse (good updates sit around 21-24%). The last column shows which complaints grew with that update.

Version	Released (approx.)	Reviews	Avg stars	Bad reviews	Complaints that grew vs the previous version
12.19	2026-09-21	104	3.61	35%	Crashes / won't open / blank screen, New UI / update made it worse
12.18	2026-08-22	159	3.99	24%	Helpdesk / support unreachable, Cab late / not assigned / no-show by vendor
12.17	2026-08-07	141	3.76	30%	Crashes / won't open / blank screen, General service complaint (unspecific)
12.16	2026-07-23	127	3.76	29%	Live tracking / ETA inaccurate, New UI / update made it worse
12.15	2026-07-09	83	4.04	23%	General service complaint (unspecific), Helpdesk / support unreachable
12.14	2026-06-22	180	3.72	30%	Slow / loading / freezes, Booking / cancel / edit / no-show rules
12.13	2026-05-31	160	3.73	29%	Live tracking / ETA inaccurate, Long routes / bad pooling

Version	Released (approx.)	Reviews	Avg stars	Bad reviews	Complaints that grew vs the previous version
12.12	2026-04-27	258	4.05	21%	Safety concern
12.11	2026-03-19	310	4.07	21%	Booking / cancel / edit / no-show rules
12.10	2026-02-18	186	4.01	22%	Login / OTP not received, General service complaint (unspecific)
12.9	2026-01-17	182	3.85	27%	Cab late / not assigned / no-show by vendor
12.8	2025-12-15	189	3.82	28%	General service complaint (unspecific), Login / OTP not received
12.7	2025-11-20	131	3.59	34%	Crashes / won't open / blank screen, Helpdesk / support unreachable
12.6	2025-10-14	285	3.81	26%	–

Comparison with other apps (last 12 months)

MoveInSync's own apps compared with two competitors. "Store rating" is the number shown on the Play Store; the other columns use only written reviews.

App	Store rating	Total ratings	Written reviews	Avg stars (written)	Bad reviews	Replied to
MoveInSync (Employee)	4.64	114,880	2,847	3.84	27%	3%
MoveInSync Partner Lite (Driver)	4.25	703	21	3.10	43%	0%
MoveInSync Driver Partner	3.50	46	5	1.80	80%	0%
MoveInSync Field	4.08	24	8	3.50	38%	0%
Safetrax Commuter competitor	4.72	24,143	114	2.89	51%	98%

App	Store rating	Total ratings	Written reviews	Avg stars (written)	Bad reviews	Replied to
Routematic competitor	4.52	8,015	155	3.86	26%	0%

Method. Public Google Play reviews (India store, English) pulled with `google-play-scraper` into SQLite, tagged against a 17-issue taxonomy built by hand-reading ~600 negative reviews (`pulse/taxonomy.py`). Keyword tagging is directional, not exact: a review can carry several issues, and spot checks put precision at roughly 80%. The Play Store's own rating cannot be broken down by period publicly, so trends use written reviews.
